LOCAL NEWS ITEMS

Hotel Royal, near C. P. R. station, on main street, Vulcan, Idaho 50c, 75c, \$1.
Regular meetings of the Elks, Vulcan Lodge, No. 121, will be resumed, following the period of vacation, on Thursday, September 8th. There is business of importance to receive attention, and there are one or two stunts of an interesting nature that will lead to the want to miss. Every Bill will be there.

The first game of lacrosse ever played in Vulcan will be that which is billed for Monday next, Labor Day. The game will start at four o'clock, and will be played on the football park, a place made excellent by the boys who play the other game and cheerful permission was given by the footballers. The idea of the game here was suggested by prominent sport citizens of Calgary who are contributing experience and time and money to maintain a place in sport for our national game. The Advocate gave publicity to the proposition and at once the old-time players resident in town and district organized a committee to sponsor the visit of two Calgary teams to Vulcan on Monday next. The idea is being generally and enthusiastically endorsed, evidence of which is the action of the business people in providing that their places be closed in good time before the play hour, and the kind offer of the Citizens' Band to furnish music on the occasion. It has developed into a community event. The contest in large measure will be a demonstration of the national game for which it will be a revival to a number of people hereabouts. The teams that will participate, Shamrocks and Tecumshs, bear the names of other teams famous in the Canadian history of lacrosse, and will surely make their performance interesting. The members of the Vulcan Girls' Basketball Club, just about the most energetic bunch in town, have undertaken the task of ticket sales, and in return for generous co-operation the committee will give to the girls' club all the money in excess of expenses if there be any. Patrons of this event will perhaps be making a two-way contribution to real sport besides getting good holiday entertainment.

LOCAL NEWS ITEMS

Mr. Lambert has completed the first of his row of three new residences.
Very soon will be offered for sale in the town of Vulcan, a fine lot without the fence, Hotel Royal, Vulcan, Alta.

Material is on the site for the construction of the new church being erected by the congregation of the Church of Christ.
There will be no services at St. Aidhelm's Church on Sunday, September 4th, but Sunday school will be held as usual at ten o'clock.

Rev. J. N. Brunton has returned from his holidays, and will occupy his pulpit at the Union Church next Sunday morning and evening. Sunday school will meet at close of the morning service.

While lacrosse has never been played in Vulcan and the majority of the people here have never seen the game, the town has a citizen who is an Englishman and played lacrosse in the Old Country. He is none other than Rev. D. F. Kemp, and his position was goal, like to that in which he has contributed so much to the record of the Vulcan football team.

We, the undersigned business men of the Town of Vulcan, do hereby promise to support Canada's national game, lacrosse, by closing our places of business on the holiday known as Labor Day at the hour of three (3) o'clock in the afternoon. Signed—Ernest King, Geo. W. Buck, Vulcan Supply Company, O. C. Morden, H. P. Ranshagen, W. D. Allen, J. Wolfe, D. Campbell, D. C. Jones, P. McAskile, H. Daines, E. E. McIntosh, N. Holmes, F. L. Simington & Co., J. D. McLaggan.

Appropos to a coming event, the boys have dug up an array of faded photos which tell the story of days of years ago. These, with the only lacrosse stick that could be discovered in town, are on display in the window of the D. C. Jones store, and all who go along that way stop to see if they can pick out the groups of youth any better known to them as men of business who have by age or avocations made recognition a matter of difficulty. Tickets attached to the pictures add interest in the search for someone you know.

There were negotiations for a couple of football games, one which would be played in Vulcan on Labor Day. But these are off, for the reason that the harvest is all to the fields of wheat has reached the boys who have performed so splendidly on the field of sport, but who have not yet played. It would appear that football is over for this year, and for the Vulcan team it was a great year. The Advocate has received and will publish next week a story in figures of the club which is an interesting record of its accomplishments. Interest locally, however, has not terminated, for on Saturday the final game for the provincial championship between Michel and Calgary Calties, the latter team being that which eliminated Vulcan in the semi-finals of the championship series.

LOCAL NEWS ITEMS

Don't despair. If you can't run, you can sit on the fence and register scorn during the race.

Anything called "a necessity in every household" is made of tin and gets out of fix next day.

Born, at Mrs. E. Speers' hospital in Vulcan, on August 28th, 1927, to Mr. and Mrs. Edwin Southworth, of Vulcan, a son.

Threshing men will take notice that they are required to have licenses before beginning their operations. Apply to the Minister of Agriculture at Edmonton, including \$1.00 charges.

Mr. Justice A. H. Clarke, and son, Mr. Hugh Clarke, of Calgary, came down to Vulcan on Tuesday, and with them Mrs. C. H. McMillan and children, the latter returning from a holiday trip.

J. J. Strang, local director of the Wheat Pool, reports an Alberta membership of 1900. He also mentioned that Mr. Carlyle, manager of the E. J. ranch, has asked for a contract form for the signature of H. R. H. the Prince of Wales.—Claresholm Review.

Material is on the site and the excavation has been made for a new residence that is being erected for Mr. Wm. D. Campbell. The location is a good one opposite the football grounds, and the building will be done by Mr. Campbell, who is a contractor.

The office quarters at the U.G.G. are being fixed-up and painted-up for the convenience and business facility of the new manager, Mr. A. K. Baptiste, who starts out right in Vulcan by becoming a subscriber to the home town paper and making a contribution to the school fair.

The Advocate man last week had as his guests two young lads who call us uncle. They are Clifford and Alex, sons of Mr. Harold Brown, city clerk of Drumheller. The boys left for home in good time so that they would take no chance to miss "kiddies day" in their home town, an event promoted by those who are known to young folks all over as the "best people on earth."

The residence and premises in Vulcan, for so long owned and occupied by Mr. Earl Clark, has this week been purchased by the Independent Grain Company, for the accommodation of their local elevator manager, Mr. C. L. Todd, by whom it will be occupied as soon as the same is vacated by Mr. Clark, who intends shortly to remove to California.—This transaction is one of the several of late which have made some definite changes in Vulcan.

A total of over twenty-five million bushels of wheat and five hundred thousand bushels of grain was shipped from Lethbridge division, comprising the 1926 crop, reports issued this morning state. This compares with twenty-two million bushels of wheat and nine hundred and seven thousand bushels of other grain shipped from the previous year's crop. Thus it will be seen that last year's crop exceeded the crop of 1925 by approximately three million bushels of wheat but fell short by some three hundred thousand bushels of other grains crop. The remarkable total of over 1,500,000 bushels of wheat were shipped from Vulcan up to the present while 1,000,000 bushels were shipped from Champion, a mill town, a mile from Vulcan, and the size of the Dominion, and the Dominion has a number of towns.

The people of Vulcan and vicinity were the guests of Dr. Barker and Mrs. Barker at a community dance at the Odd Fellows' hall on Friday night. This is one time that the hall capacity was not sufficient, the number who came to participate in the wedding party and collectively extend felicitations making the largest assembly of the kind ever held in Vulcan. It was indeed a very merry event, the pleasure of the guests conveying to Mr. and Mrs. Barker the best of wishes for their success and happiness, also expressed by Mayor Butchart when he made to the newlyweds a presentation of a beautiful set of silver. The gift of the Doctor's friends in town, Mr. and Mrs. Barker in neat little speeches made reply to the address which had the hearty endorsement of all present. Joy was unconfined, and they danced and danced until well into the next day, stopping only at the midnight hour for the serving of delightful refreshments. Mr. and Mrs. Barker start their new relationship with an abundance of good will.

The dailies the other day carried the report of a horse shoe tournament in a country town up north. It seems as if the game of horse shoes is being indulged in more this year than usual, but it could not be spoken of as a revival; for this form of sport, going back in principle to the discus throwing of the ancient Greeks, has never been absent within the period of written history. In early England it was known as quoits, with heavy iron rings, used, and this name, the use of rings persists to a considerable degree, but horse shoes appear to be the official style in this country. Quoit pitching became so general in England in the fifteenth century that royal attempts were made to end it in favor of archery. One of the writers of the period speaks of "quoiting as too vile for scholars." It is noted, however, that scholars at picnics still take to it about as keenly as any, while archery, much as there is to be said for its gracefulness and test of skill, still requires efforts to keep it alive. Horse shoes, first used by workmen for lack of quoits, now are made specially for the game, with regulation weight, and finished as elegantly as desired, in gold, bronze, nickel plate or aluminum. So let the ancient and honorable game be fostered everywhere.

LOCAL NEWS ITEMS

Mrs. E. Schagel, of Kalispel, is visiting in Vulcan, the guest of her daughter, Mrs. Max Mute.

What the world needs is not something to cure human ailments, but something to get people over the notion that they need curing.

Several players from Blackie came down to Vulcan on the first day of the week and made a few rounds on the golf course. The course is now the best that it has been this year.

The High River Elks' band are now away to a good start with their fall practices. Mr. A. J. Ober of Vulcan, has been engaged as instructor with regular practices every Wednesday night at 8 o'clock in the Elks' hall.

Mr. "Scotty" Brown, one of the most popular of our football crew, was this week the subject of a minor surgical operation, made necessary on account of an accident in a recent game.

One of the half-holidays was on Wednesday. Fact is that for a couple of weeks there has been a little slipping in the holiday matter, but there is an excuse in the busy season, for when a farmer comes to town in this period he must be served, and service is the first consideration of Vulcan business people.

Mr. W. S. Benn, of Claresholm School of Agriculture, is this week in Vulcan and vicinity in the interests of the school fair. Mr. Benn is organizer of school fairs which are under the jurisdiction of the School of Agriculture. He and the judging staff will officiate at the Vulcan fair on the last two days of this month.

Referring to our record last week of the first delivery of grain to the Terwilliger elevator, Mr. Ray Davis says that he delivered the third load to this elevator and was the first to make delivery with a team of more than two horses. This elevator, as well as the others of the "big eight," have a history of interest, incidents of which this journal will be pleased to publish.

The baby boy recently born to Mr. and Mrs. Phil Lucas, of Vulcan, is a distinguished lad, in that he completes the fourth generation now living of the families of both father and mother. There are few, if any, boys or girls in the whole wide world who have grand-parents and great-grand-parents on both sides of the house, and living. This is indeed quite a remarkable incident, and Vulcan is the place of things remarkable.

Recent visitors from Vulcan to Salmon, Oregon, bring back word of the emigration of a singer and pianist, who has attained as a soloist, and demand for her services as a soloist. It is not so long ago that Miss Gardner was one of the girls in the Vulcan junior choir, an organization of local pride which is still maintained by the succession of the younger girls to the places of those who are constantly retiring. Miss Beulah Walker and Miss Marian Lebeau are two others of the choir who have figured prominently in music.

Mr. Willie Butchart brought to the office of The Advocate the other day a copy of the Daily Mirror, published in far-away England, containing a large photo of the Vulcan cyclone, and this is one of the papers that omitted the exaggerated story of destruction carried by so many of the others. Many citizens have told of receiving enquiries from friends as to their safety, prompted by the world-wide publicity given in pictures of the storm. What with storms and the several more adventurous possessions, Vulcan is perhaps the best known town of its size in the Dominion, and the Dominion has a number of towns.

The people of Vulcan and vicinity were the guests of Dr. Barker and Mrs. Barker at a community dance at the Odd Fellows' hall on Friday night. This is one time that the hall capacity was not sufficient, the number who came to participate in the wedding party and collectively extend felicitations making the largest assembly of the kind ever held in Vulcan. So let the ancient and honorable game be fostered everywhere.

LOCAL NEWS ITEMS

Schools in Vulcan will re-open on Monday, and everything is well set for the event.

The W. A. of St. Aidhelm's Church will meet at the home of Mrs. Dieler on Friday, September 9th at three in the afternoon.

The Madison pool parlor this week goes on the paint-up roll of honor. Keeping up with the bunch has given the town a much improved appearance.

Mr. John F. Miller, eyesight specialist, of 104 Underwood Block, Calgary, will be at King's drug store in Vulcan, on Saturday, September 10th, for the purpose of correcting your and your children's eyes. Do not miss this opportunity.

Mr. Fowler, baritone, of Calgary, conducted the singing at the Reid Hill Baptist Church on Sunday last, and rendered solos, being one of the features frequently introduced by the pastor, Mr. Ralph Easter, who is endeavoring to make the services as interesting as possible.

Mr. Cecil Gardiner, not so long ago a graduate of the Vulcan schools, and when in the intermediate grades a contributor to the school fair, will shortly enter the University of Illinois and take a course in mechanical engineering and former school-mates and everybody will wish him well.

Mr. J. A. McAlpine, who has made an auto trip from Vulcan to Moscow, Idaho, and returns says that he has seen no better town or district than Vulcan on the journey, and crops are not so good anywhere. He made the trip to return his daughter, Mrs. Eshom, and other members of the family to their home in the Idaho city.

"His People" was the feature attraction at the picture house on Monday and Tuesday nights. The picture was extra good, but the attendance not so good. However, the show was the contribution of Manager Rossom to the school fair and the exchequer of that institution gets an addition of twenty-one twenty.

Vulcan still makes contribution of patients to Calgary hospitals, and the last of these are Miss Lynetta Parslow and Miss Irene Lissette. Both are afflicted with appendicitis, and this is the second time for the last named. Happily, and thus far, our patients come back in good health, and this week we are pleased to report the return of Mrs. Roy Ferguson.

Things must have gone well with the ball team over at Claresholm this year. They won the Brewery Cup, and disbanded only when there were no more games to play and no challenges for the trophy. The boys were given a real party when all was over, and representatives from Staveley helped them to make speeches and have a good time. Both Claresholm and Staveley teams were backed by the Elks.

The past week has been favorable for the growing crops, with little rain and considerable sunshine, but with cool nights when the thermometer has been showing an average of 44 degrees. The grain is considered in shape for cutting, as is noticed by the operations of binders in all directions, and the cutting is now going merrily on and will be rushed to a finish. Some samples brought in show remarkable wheat with big yield prospects.

During the past week the two big new elevators at Vulcan, the Pioneer and Parish & Heimbacher, have both handled their first grain. The mechanism used in the handling is operated by electric power, and everything worked as slick as a whistle. The new Pioneer is in charge of Mr. Wes. Griffin, who has for some years operated the elevator sold to the Independent Grain, and the Parish & Heimbacher is in charge of Mr. Chet. Wallace, well known in the trade at this point. There is real activity in the whole line-up of elevators on the row, fixing-up, to handle the coming crop, which is predicted by some to exceed that of 1925.

The special prize list and program for the school fair has been printed and will be in circulation before this announcement is generally read by the public. Besides the big features of the event, this list and the regular list detail about one hundred and sixty-five distinct sections in which pupils may enter for exhibition or competition, and the prizes number from two to six in each case. This constitutes an opportunity not equalled by any school fair anywhere, and the value and amount of the prizes is the greatest in the province. The return expected is the earnest effort of the pupils and a good word to them by the parents. The co-operation of teachers is assured. The schools are rapidly remitting their fees. Personal contributions are acceptable. The more money subscribed the more the boys and girls get in prizes.

The garden party last Friday at the residence premises of Mr. and Mrs. Jack Wolfe was the first ever held in Vulcan, and the standard attained will be hard to equal. The real beauty of the place was enhanced by the scheme of decoration, which included tastefully arranged colors and pretty illumination. It was a real garden party, such as make town popular social events, pleasing to patrons and profitable to promoters. There was a diversity of games, sufficient to meet many a fancy, provision to eat and drink and to tell you and a woman who knows to tell you of the future. Concert music was provided by the Citizens' Band, and the program was excellent. Dancing was perhaps the favorite pastime, and music for this was provided by the band and an orchestra of local musicians, and so well was this feature patronized that many went back on Saturday, and the happiness of the thing was terminated only by the twelve bells. More detail could be given to this delightful and successful affair, but sufficient it is to say that it was great in every respect. The Women's Institute made some money and the patrons add their gratitude for entertainment provided in a way new to Vulcan.

McLAUGHLIN-BUICK for 1928

Cushions that fit you like your Easy Chair

A NEW feeling of luxury—of relaxation—of a restful, satisfying comfort—comes over you when you sink into the seat of a McLaughlin-Buick for 1928. For these seats are like easy chairs—made so by tailoring them to fit you, just as fine furniture is tailored.

In every way McLaughlin-Buick for 1928 gives the greatest measure of riding comfort. Hydraulic shock absorbers, front and rear—made an integral part of the car by redesigning McLaughlin-Buick's springs and chassis—smooth out the roughest roads and prevent rebound, adding still further to the joy of McLaughlin-Buick travel.

This is another indication of McLaughlin-Buick's greater value—another reason why you should buy a McLaughlin-Buick for 1928.

VULCAN ADVOCATE

VULCAN, ALBERTA

KITCHEN VICTORY

That fragrant steaming that drifts in from the kitchen is beginning now to permeate the entire house, and the wise and immediate relatives of the busy, flushed and tired housewife have not a word to say. It is one of those expectant times, when a hush seems to settle everywhere, and nobody feels like starting the peonograph, and nobody quite dares to ask when supper will be ready. But it is ready, after awhile, and the star number on the program is a peach cobbler. There are some peach preserves still warm, and the members of the family silently reflect that there were sliced peaches for breakfast, a peach pie for the noon meal, and every time the baby asked for a piece between meals he was given a peach and told to run outdoors and play. One of the great gustatory victories of the year has just been won. The peaches have been canned. Out on the kitchen table they stand—those two dozen quart jars of peaches, in a double row, handsome little soldiers, ready to be marched off to pantry or to fruit cellar. Think of winter days, when the lights will have to be lit before the evening meal!

MUCH MONEY FOR ROADS

This paper believes that all things considered, the public works department of Alberta has done very well in the matter of providing good roadways on our provincial highways. Motorists who have made a tour throughout Oregon, Washington and other States have in some instances criticized too severely our highways. Comparisons are alright at times, but it is not fair to compare Alberta roads with California or Oregon. Instead we should compare them with the condition in those States when they were the same age and had the same population as we have today. In comparing our roads with those in Montana we are informed that Alberta roads compare very favorably with those of our neighbor to the South. We need better roads, but to get them means the expenditure of a lot of money and the motorist must be prepared to pay his just share for maintenance and upkeep. Good roads mean a saving of time in travel, wear and tear of cars, in gasoline, oil, etc. Alberta has done well in the matter of good roads, having spent five million dollars in the past three years.

GAVE OF HIS BEST

A short time before his death, Jola Oliver, premier of B.C., said in an interview: "Well, we didn't always do the best thing politically, but we did the best we knew how. That's all any of us can do." The editor of the Lethbridge Herald commenting on the interview adds: "Not only is doing the best we know how, all we can do, but it is the best contribution we can make to our fellows and our world. If we all did the best we could we would all measure up as better citizens, and the place in which we live and the country to which we belong would be the better for it."

This is the day of the young and vigorous.

PEST SALESMANSHIP

Newspapers in other communities are now giving publicity to a salesmanship pest that has annoyed people in Swift Current for some time. Reference is made to the practice of sending articles through the mails, unaddressed, with an accompanying letter either to return the goods or to remit the amount of invoice attached. Ties, silk stockings, and cosmetics are the most common. Mostly the goods are cheap and shoddy, a disguise for the reasonable price asked. The public is advised that it is unnecessary to pay attention to the letters asking for return of the goods. A person is within legal rights to inform the sender that he must call and get them. The practice is annoying, however, and there seems to be a desire to offer some sort of retaliation. The post office department is helpless in the matter, as it can only act if the unaddressed goods are sent C.O.D. A farm paper, according to Printer's Ink, has found a way to make it possible for the public to go a considerable distance in ending the nuisance. "The paper is in the public's hands. When unaddressed goods are received the long suffering citizen should acknowledge receipt. In the same letter he should specifically state that they are placed in storage awaiting the call of the owner and then should quote his storage rates—rates which he, of course, is free to fix of his own accord. After making this statement he should plainly indicate that when goods have been held for a certain length of time they will be sold to cover storage. There is no doubt that the general adoption of this plan will quickly end the career of this widely practised form of 'pest salesmanship'."

HELPS TO KILL DULL SEASON

A ingenious merchant discovered that the logical time to advertise extensively was when business was slow and in the periodical dull seasons of the year. Before that discovery the average business man slowed down in his advertising when business slowed down. He generally ended up the dull seasons with a quarterly sale, but as far as his newspaper advertising was concerned, there was little advertising when business was quiet. The modern up-to-date business man holds a different conception of the purposes and uses of newspaper advertising. There are a few phases of business which have always been known to all business men. Among these are the alternating busy and dull periods of the year, month, week and day. A systematic, effective and economic plan of advertising had to be constructed upon a full knowledge of this business cycle. Extensive advertising has been found to be a remedy for the business depression epidemic. People have a habit of confining their shopping to the last of the month, the last three days of the week and the after shopping hours of the day. From experience, merchants have learned that newspaper advertising helps to eliminate the rush periods and spread the volume of business more evenly over the day, week, month and year. It has prevented congestion, simplified salesmanship and merchandising and increased business.

GARNET WHEAT

Garnet seems entitled to rank among the good milling wheat. This is the considered opinion of Mr. L. H. Newman the Dominion Cerealist as expressed in his new bulletin on "Garnet Wheat." The chief point in which Garnet may be open to a little criticism is in the colour of the flour which is slightly more yellow or light yellow or creamy yellow while freshly milled may be described as creamy than is that of Marquis. That of Marquis may be described as 'cream' white. Since, however, bleaching and maturing processes have become highly developed and are becoming generally practised, the objection to the color of Garnet, if it is an objection would appear to be appreciably minimized. Garnet seems to be about the equal of Marquis in weight per measured bushel, and where the supply of moisture is ample it may even exceed the older wheat. The two wheats are about equal in flour yield but the ash content of Garnet is generally appreciably higher than that of Marquis. Garnet flour generally produces a little higher bread yield and a loaf of slightly greater volume than Marquis. In texture of crumb Garnet is almost equal to Marquis, superior to Early Red Fife, Early Triumph and Kitchener. Good texture combined with high volume is commonly regarded as an indication of high baking strength.

The outlook is good for a fifty thousand ton sugar beet crop or better, in the Raymond district. The price of beets is guaranteed at \$7 per ton, which means that \$350,000 will be spread among the growers. Add to this another couple of hundred thousand spent for labor, fuel, and materials and the sugar company at Raymond will put over \$500,000 into circulation this year. This is a real industry and more beet industries should be developed in the province.

Change from one type of car to another with no car: selling in the mean while, is said to cost Henry Ford \$1,000,000 a day. Meanwhile General Motors is selling more than 100,000 Chevlets a month. Fortunately for Henry Ford car can afford to lose \$1,000,000 a day, for a while, as he always keeps about \$400,000,000 cash in the bank. There will be a big automobile field in automobiles when the new Ford car is unveiled. Printing is the bridge of time uniting yesterday with today, over which passes most of the world's history any day which we record the world's progress, valor, aims and achievements—Clarence Wellington.

One of the most perplexing questions Petrolia doctors have to answer is where to vaccinate a young girl. At one time the left arm was considered the proper place, but soon sleeves showed an unlighty scar so the location was changed to the leg. Then came a change in skirts and the question is where can the doctor vaccinate so that a scar will not be seen twenty years hence.—Petrolia Topic.

Charles Haydon, of the editorial staff of the Calgary Herald, was nominated so capably as president of the Calgary Flower Show, came in for words of praise for the very successful show held last week. In the opinion of visitors from all parts of the compass, it was the finest floral festival ever held in the west and it was with regret that the fine blooms on display were taken down.

PREMIER BALDWIN AT HOME

Premier Stanley Baldwin, on his return from Canada addressed 20,000 people at a Conservative fete at Douglass Castle, Lanarkshire, and highly eulogized the Dominion. "There is no spot to which I would rather come to from Canada than the heart of Scotland," Premier Baldwin declared in opening. "There has been a great deal of evil propaganda about the world, especially in new countries, 'telling that the people of Britain are decadent. I was able to tell Canada that this country, so far from being that, is the same as it was ten years ago and that our spirit is undimmed and our courage unquenched.'"

"Mistakes have been made, but I am proud of the courage and patience with which our working people have stuck gamely to the almost impossible task of rebuilding and are slowly and surely winning through." "That message was received in the new world with the greatest enthusiasm," the premier went on. "The reception given to the Prince of Wales was striking evidence of his popularity and of the allegiance of the people of Canada to our common crown."

Premier Baldwin proceeded to narrate how he had travelled 11,000 miles in 32 days, making 26 speeches and setting foot in every province. "I was struck by the results already obtained by the comparatively small population. Nothing struck me more than the part Scotland had played in the development of Canada."

"Another impression was the faith which all Canadian held in the future of their country. Canada has one great advantage over us. She benefits by our experience and is without many troubles that beset us. There is one thing she does want to take from us. She wants our people. I put two questions to people I met there: Are you happy? and 'are you doing well?' 'Every case the answer was 'yes. I do not assert that there were no grouches, but they kept out of my way, I wish they would do so at home.'"

If Everybody Did It!

Think for a moment what would happen if, even for one week, everybody in town were to shop elsewhere—either in a neighboring town or by mail! Would it not cause consternation, and would not all business houses be very much concerned? They certainly would, and with good reason.

Some Do This Regularly

—And what is the result? Every dollar sent to distant business houses is gone for good so far as that particular district is concerned, and merely serves to build up and maintain some distant town. The local business men are robbed of that circulation of money which during its ramblings might help dozens along the way.

How About Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home printer is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

The Vulcan Advocate

Fifteen Years Serving Vulcan and Adjacent Community

Air mail service between Winnipeg and Fargo, North Dakota, has been inaugurated and the first mail for Winnipeg from the United States arrived recently.

The potato acreage along the Dominion Atlantic Railway line is larger than last year and a 40 per cent. crop increase is looked for. There will likely be 175,000 barrels available for export, as compared with 132,000 last year.

British Columbia's farms produced \$71,362,209 last year, breaking all records and gaining \$6,208,696 over the previous year, according to the final figures of the Provincial Statistician, G. H. Stewart. Lumbering leads with agriculture second.

London, Ontario, now has an air harbor. Through efforts on the part of the Chamber of Commerce an ideal air-field site has been taken over and, within a month's time, will be completely equipped and marked so as to provide an air depot available to all planes that seek London as a stopping place.

According to a financial statement issued from the headquarters of the Canadian Pacific Railway Company, the gross earnings of the company for the first six months of the year ended showed an increase of \$3,614,778.06. The net profits, however, decreased about \$900,000 due to a four million dollar increase in the working expenses for that period.

CORNERSTONE LAID

The laying of the cornerstone of Corinthian Lodge, No. 22, at Okotoks, Friday, August 26, by M.W. Bro. George E. Cruikshank of Hillcrest assisted by other Grand Lodge Officers was solemnized in the presence of a large number of masons of Okotoks, High River and other points as well as citizens of Okotoks. The day was ideal for such a function and the ceremony was most impressive. The lodge opened at 2:30 in old masonic hall and the members filed out and paraded two abreast to the scene of the laying of the corner stone. Corinthian lodge was instituted just twenty years ago this summer and owing to the large increase in membership (to a large extent from the oilfields) Okotoks found the old quarters too congested and finally decided that a new masonic hall be erected, the contract being given to a contractor of Okotoks, also a member of the lodge. The new building will be 66x32 feet with full basement. The basement will have a banquet room approximately 47x32 and three rooms on the north end of basement as kitchen, ladies room and gents room. The upstairs main lodge room is 47x32. There is a main lobby and also Tyler's room and preparation room. The lobby will have a fireplace (gas) and the main hall will be heated with three radiant heaters. The building will be finished with stucco and they hope to have everything completed for their first meeting in October.

The District Masonic Meeting for this district consisting of lodges from Granum to Okotoks will be in the new building on October 26th next. R.W. Bro., R. Knowles, D.D.G.M., of this Masonic District will have charge of this meeting. It is expected that this will be the largest district meeting held in the district to date. On account of splendid crop conditions and the interest outside lodge members are displaying in the construction of such a commodious and comfortable lodge quarters by the Okotoks brethren, it is anticipated that a large representative gathering of masons from all points in the district will be present.

Corinthian Lodge is to be sincerely commended on its enterprise in having constructed at such great expense a building that will be a credit to the lodge as well as the town of Okotoks. It was pleasing to note that among former residents of Okotoks present were J. S. McHardy, A. Bricker, D. McKay, Chas. Clark and P. G. Thomson. The latter was the first junior steward of Corinthian Lodge.

POLO

High River loses to Vancouver 5 to 3.
Wins from Calgary 7 to 2. Games
Continued All This Week

High River polo team had their first try-out in a game on Tuesday afternoon in Calgary against the Vancouver team, in the Western Canadian Championship series, which is being played there and were beaten by the coast team at the close score of 5 to 3. That the locals made an excellent showing is noted by the statement of a veteran player who remarked that this particular game was the greatest polo match seen in Calgary in the past fifteen years. It was the feature of the tournament, and augers well for our team considering their little practice and poor inexperienced condition of their ponies, which lost them the game. They were pitted against, perhaps, the strongest line-up in these contests and their showing was remarkable. The weather was fine and the ground in good condition and a fair crowd in attendance on this opening day. The High River team opened with a rush, disconcerting their opponents, and P. Limoges shot the ball through the posts in a well-directed shot after three minutes of play, in the first score of the game. The game was reckless and fast from this on, the Vancouver four hitting accurately and scoring three points before the chucker was ended. Frank McHugh, captain of the High River's scored with a back-hand flip in the second chucker, and no further scoring was made until the fourth chucker when the Vancouver's again shot one over. The fifth saw the teams riding furiously, and Frank McHugh again put the ball through the net. Wilmot of the Vancouver's got another which ended the scoring. The High River team was weakened by Alex. McHugh's accident of breaking three ribs a few days before the game, but he played through and worked fast. Their inexperienced ponies also were a handicap, but a little more practice will have them in much better form. The line-up of the teams were as follows: 1, P. Limoges, 2, Alex. McHugh, 3, W. Deane-Freeman, back, Frank McHugh, subs., E. H. Capers and F. Watt. Vancouver—J. P. Fells, back, Norman Drysdale.

In the second game played on Wednesday between High River and Calgary No. 1, High River ran away with the game by the score of 7 to 2. The same line-up was played for the locals.

Mr. and Mrs. Hector Charlesworth of Toronto, will visit in several points in Alberta during the first week of September. Mr. Charlesworth is the editor of Toronto Saturday Night.

Building permits went over the million and a half mark for the first seven months of the present year, the exact figure being \$1,592,482, the increase over the similar period of last year being \$107,000.

Here and There

The United States' interest in the development of the locomotive in Canada is seen in a request by the Baltimore and Ohio Railway to the Canadian Pacific Railway to send one of its latest passenger types of engine to the centenary exhibit of locomotives, which will open at Baltimore on September 24th. The Canadian Pacific has arranged to supply one of its latest types of the "2500" class locomotives, complete with crew, for the occasion. This is the company's fastest and most powerful passenger locomotive.

One of the strangest attempts at taking a census is now being made by Andrew Widsden of Bella Coola, B.C., according to information received here. At the request of Harlan I. Smith of the National Museum of Canada, Mr. Widsden is taking a census of the grizzly bear population of some eleven valleys along the fjords which are included in the "Norway of America" traversed on the steamship journey between Prince Rupert and Vancouver. The coast line between these two ports is a noted big game hunting spot and attracts many grizzly hunters each year from all sections of the continent as well as from other parts of the world.

NOTICE

To: Alfred M. Houghton and Elizabeth Houghton (his wife)

TAKE NOTICE that an action has been commenced by Donald Sinclair against you in the Supreme Court of Alberta, Judicial District of Calgary, Trial Division, to recover the sum of \$1068.13 and interest being the amount due by you to the said Donald Sinclair under and by virtue of a Mortgage made by Alfred M. Houghton to the said Donald Sinclair covering the South West Quarter of Section Sixteen (16) in Township Eighteen (18) Range Twenty-three (23) West of the Fourth Meridian in the Province of Alberta, said land now standing in your name in the Land Titles Office for the South Alberta Land-Registration District and further for the foreclosure of said mortgage.

AND FURTHER TAKE NOTICE that you are required to file a Statement of Defence or Demand of Notice in the office of the Clerk of the Supreme Court of Alberta Judicial District of Calgary on or before the 30th day of September, A. D. 1927, otherwise the Plaintiff, Donald Sinclair, may proceed without further notice to you.

DATED at Vulcan, Alberta, this 17th day of August, 1927.

Approved: His Honour Judge Macdonald
L. J. S. C. L. H. Stack,
Solicitor for the Plaintiff

Gay Festival At Banff For Scots

Scots folk in Canada and the United States can well look forward with keen interest to renewing acquaintance with many of the delights of the home country on the occasion of a Highland gathering and Festival of Scottish music to be held at Banff September 3 to 5 to which the Prince of Wales has given his patronage. What more magnificent setting for a Highland gathering could be chosen than Banff with that vast amphitheatre of Rocky Mountains encircling the headlong waters of the Bow and Spay Rivers. Scottish fur traders who first penetrated these mountains a hundred years ago were awed by the ruggedness of the scene and impressed by its similarity to their own rugged highlands. The force of circumstance and the love of adventure have brought many Scots to this Western world and it is only natural that they should wish to take part again in the old sports and traditional tests of manly prowess which will be a feature of the gathering, in addition to a wealth of Scottish music. The recorded history of this music goes back to the days of Columbia whose mission, established in the sixth century at Iona, read its influence all over the south and west of Scotland.

Many of the finest exponents of Highland dancing in Western Canada have intimated their intention to take part in the gathering, and Banff, which is the tourist capital of the Rockies, will be ablaze with the tartans of Scotland. Brawny Highlanders, too, will take part in tossing the caber, putting the ball, throwing the hammer, and other such sports.

Supplementing these features will be a series of concerts in the great ballroom at Banff Springs Hotel, for which several of the best known Scottish singers have been engaged including J. Campbell McInnes noted for the rendering of Border and Highland ballads; Madame Jeanne Dussseau, who under her maiden name of Ruth Thom attracted the attention of Mary Garden, the well-known prima donna, by her beautiful interpretation of old Scottish songs; Davidson Thompson, the Winnipeg baritone, who sang with the Minneapolis Symphony; and Ruth Matheson, Winnipeg's fine contralto. Gaelic singers will be represented by Norman Cameron tenor and by a group of folk-song vocalists from the Hebrides, who recently came to make their home in Canada. The programme of Scottish music

has been drawn up in historical sequence, commencing with old ballads of the fourteenth and fifteenth centuries, followed by groups of the periods of Mary Queen of Scots, Stuarts, and Jacobites. In turn there will be songs by Burns, Sir Walter Scott, Lady Nairne, and Christopher North.

Hebridean music, recently made popular by Mrs. Kennedy Fraser will also be featured, and place will be found, too, for the folk-songs and dances of Highland tribes of Indian whose hunting grounds were from time immemorial in the Negabaring Rockies. These Indians will be gathered in a picturesque encampment and with their teepees and variegated costumes they will add another note of colour to the gathering.

By the courtesy of the Canadian minister of Militia each of the seventeen Highland Regiments in Canada will be represented by its best regimental piper in an endeavor to secure a beautiful trophy offered by E. W. Beatty, chairman and President of the Canadian Pacific Railway Company through whose interest and generosity the organization of this unique Highland Gathering at Banff has been made possible.

for Economical Transportation

See THE GREATEST Value IN CHEVROLET HISTORY

QUALITY has always come first with Chevrolet. And never before has the Chevrolet insistence upon quality been so strikingly exemplified as now!

Improvement where improvement was possible! Refinement where refinement could be made! Grace and beauty added to the Chevrolet quality of rugged endurance! Chevrolet has left no stone unturned in the building up of Chevrolet QUALITY... quality which has won Chevrolet the greatest automobile sales volume in the world today.

And, Chevrolet has used its popularity, its huge production, its vast resources, to effect substantial savings in purchasing and manufacturing costs—and Chevrolet is sharing these savings with the buyer, in the form of new and lower prices.

Come in today. Learn that the Most Amazing Quality and the Lowest Prices in Chevrolet History constitute the greatest Value that even Chevrolet has ever offered.

BANK OF MONTREAL

Vulcan now figures in the history of the Bank of Montreal, which covers a very considerable period. The branch at Vulcan was established in 1926, under the supervision of Mr. W.T.R. Henderson, of the inspection staff of the institution, and Mr. D. H. Allan was the first manager. He was succeeded on January 16th of this year by Mr. H. Sutherland, who is at present in charge.

The history of the Bank is interesting. It established the beginnings of the Canadian banking system when, so far as June 23, 1817, nine merchants signed Articles of Association for the establishment of the "Montreal Bank," giving what is known as the Bank of Montreal today the distinction of being by far the oldest institution of the kind in British North America and one of the largest financial institutions in the British Empire. The Bank's history goes back to the time when the only organized portion of what is now the Dominion of Canada was what were known as the Provinces of Upper and Lower Canada and the Maritime Provinces. The population at that time was less than 400,000, and that of Montreal, the chief trading centre, less than 20,000. It is of much interest to note, when comparing those days with the Canada of today, that the country was too poor to allow of metal circulating coins, not only American, British and French, but also Portuguese and Spanish coins were legal tender, with the ratios of exchange into colonial money subject to frequent variations. From the day of November 17th, 1817 when the Bank of Montreal started in modest rented premises, with a paid-up capital of \$500,000, it has developed to the extent that at the present time it has over 600 branches throughout Canada and Newfoundland, with a paid-up capital and reserves representing a total in excess of \$60,000,000 and assets amounting to over \$780,000,000.

OIL NEWS

Much interest was evinced by members of the Oil Fields Editors party while here in the oil fields of Turner Valley. Mr. J. T. Smith, editor of several widely read English oil papers who has watched developments very closely for some time will take time to make a personal visit to the fields while at Calgary today, and will turn over a knowledge of what the Turner Valley oil field is, and will place the facts before readers of his papers who are to a great extent the investing public of Britain.

Vulcan oil well No. 1 is arousing much interest in oil circles inasmuch as this well has gradually changed from 67 gravity to 74 gravity to about 67 gravity. Mr. Snyder, the driller gives the information that this change has been gradual, since the first crude was observed three weeks ago and it was his opinion that it would continue to alter in the future. This opinion is also shared by President Spooner who believes the product of the well will change until it becomes a producer of high grade crude oil. At times, as has already been pointed out, the well flows a reduction of the flow of wet gas supposed to indicate freezing in the well bottom. Samples of this oil test 0.7 gravity. The performance of Vulcan No. 1 well during the coming few months will be watched with the greatest interest by officials of the company. Mr. Spooner said:

"Macled Well No. 1 will be deepened in an attempt to increase the production of crude oil from the lower sands and if commercial production is not obtained at 3000 feet they will go down to the big production what they call dolomite."

Illinois-Alberta oil well appears to be increasing in production by about 88 barrels per day.

The Spooner well is now said to be down in the line and big things are expected to develop very shortly.

Vulcan oil well No. 2 is down to a depth of 3300 feet with ten inch casing put down to about 3100 feet.

The Highwood is down 3,000 feet and making hole for 8 1/2-inch casing. The 10-inch casing was cemented at 2,400 feet. The Millarville well was down 1,140 feet after having made 500 feet of hole during the week.

The new Regal Oil Refinery, which began operations, the first shipment of oil received being from the McDougall-Segur Co. The refinery has a capacity of 750 barrels a day, and refining being done under a topping process.

8TH CROP REPORT

Issued by Department of Agriculture, Government of Alberta, Edmonton August 27, 1927

The whole province gives promise of an excellent crop with high average yields of all kinds of grain. Late seeding with abundant moisture in the early part of the season, is responsible for the somewhat late ripening of the general crop. The warm sunshine we have had this last week is ripening the crops with great rapidity. The earlier varieties of wheat, particularly that sown on tighter land are now mature and a considerable amount of cutting of this grain has already been done. Cutting will not be general, however, until the first week of September. A careful check-up of the frost situation shows that there has been no frost damage except in the extreme northeastern section of the province. In some isolated districts in this area frost struck rather heavily. Except in the above area the province is entirely free from frost damage. Hail damage has been more prevalent than usual, with the result that damage from this source, however, is negligible. Notwithstanding the losses caused by the above mentioned agencies, if no further serious losses occur, we are convinced that the province will have the largest total yield of wheat in its history. A particularly significant feature this year is to be found in the fact that there is a uniformly good crop in every section of the province. Large numbers of harvesters are now arriving, and it is not anticipated that any shortage of help will occur.

The Regina "On to the Bay Association" has endorsed the selection of Churchill as the Hudson Bay railway terminal.

MRS. F. C. ALCOCK
Champion, Alberta, member Provincial Executive Women's Institute.

NEW W I DIRECTOR

Mrs. F. C. Alcock, of Champion, the new provincial W. I. director for the southern district, is an Englishwoman—one who came to Canada 18 years ago to take up life on a farm near Champion. Prior to that time, and for 10 years in her new home she had never belonged to a woman's club, and had literally lived up to the old adage that "Woman's place is in the home." Then one day some eight years ago she attended the meeting of the Women's Institute in Champion, when Miss Isabel Noble of Daysland, the provincial president, was speaking. She became interested and enthused at once, seeing especially what this organization was doing for the lonely farm women. She joined and became an active worker. Next year she was president of the Champion branch and was sent as the "official delegate" to the annual convention in Calgary. That Fall she was elected constituency convener of the Little Bow constituency, and has held this office continually ever since. At the annual convention this year she was elected unanimously to the office of district director, which gives her the honor of being on the new Provincial Executive.

It was the success of her work as constituency convener that earned her the higher office. Little Bow is the "heaviest" constituency in W. I. work in the province, there being 14 branches and four girls' clubs. Mrs. Alcock was indefatigable in her work and always made it a point of paying each branch a visit every year, bringing with her renewed inspiration and enthusiasm. She kept every branch interested and working. One of her chief ideals, which she never failed to urge, was the interest in the newcomer, and those things that would brighten the lot of the rural woman. She emphasized child welfare and help to the young, expectant mothers. She encouraged secretaries to write their problems to her, and if any special or difficult work came up, often she surprised the branch by paying an unexpected visit and giving them encouragement in person.

Because she, too, had been a stranger in a strange land, and a lonely newcomer, she was able to extend a helping hand especially to those from England, her former country. "When I came West," said Mrs. Alcock, "help was plentiful and inexpensive in England. Therefore I found the work on an Alberta farm very hard. I also missed having a church. In the 18 years I have been in this country I have learned to love it. Of late years my husband has rented the farm and we now live in town at Champion. All I ask of this new office is that I have the same response as I have had in six pleasant years as constituency convener."

POOR FISH SEASON

The fishing season in Alberta will close this year on October 15. The season opened on June 15 and has been very poor so far, owing to the heavy rains and the consequent high muddy waters in all the rivers and creeks. Fishermen have been unable on account of the wet roads, to get to their favorite places. The amount of fish being carried down by the flood waters has made the fish fat and slushy and contemptuous of the fisherman's bait.

However, it is hoped by those interested in the sport, that this year's poor fishing will create fishing in the next few years that will be better than ever before. There will be more fish in the rivers and with such high waters and a plenitude of food the fish will be able to penetrate far back in the small streams to spawn. Fishing has been reported best all season in the Highwood river.

Two new fish laws have been passed this year. The first was a reduction of the daily catch limit from 25 fish to 20. The second was that every fisherman must be equipped with a diskormer. The latter restriction is very good as it ensures life to a number of small fish, that upon being "thrown back," were formerly dying.

The Alberta Fish and Game Preservation Society, which was just started this year, has already justified its existence, as it has been watching with eagle eye all infractions of the game and fish laws. Several convictions have been secured this season by the society, and it is expected that great game and fishing future lies ahead for Alberta, while her rights are guarded by the members of this society.—Calgary Herald.

An eastern newspaper has awarded a cash prize for this definition of a politician: "A politician is a man who always flies with the wind." We think the prize should have gone to a her contestant who defined a politician as "One who has his finger in every pie, but merely supplies the sauce."

The Canadian government will establish during the summer of 1927 three aerial bases in the Hudson Bay district, at the east and west ends of Hudson Strait and midway between the two distances of 500 miles apart. Six aeroplanes will be used to do exploratory work regarding Hudson Bay navigation in its application to the Hudson's Bay railway and terminal facilities.

UNIFORM FREIGHT RATES

The judgment of the Board of Railway Commissioners, equalizing freight rates, east and west, on export flour, grain and other commodities, means a saving of millions of dollars yearly to the farmers of the west is the opinion of those in authority, after carefully reading the report of the commission. Both railways are affected. There are four outstanding points in the order:

- (1) The rates on branch lines—those governed by the Crow's Nest agreement, not to be exceeded—are to be reduced to the same basis as the main lines.
- (2) The rates on grain and flour from prairie points for export via Pacific ports is to be on the same basis as the rates to Fort William.
- (3) The rate of 34 1/2 cents per hundred on wheat and 33 cents on other grain over the National Transcontinental from the head of the lakes to Quebec, is reduced to 18 cents per hundred, and Quebec is put in the same basis as Montreal in respect of export rates on grain from Georgian Bay ports and from Toronto.
- (4) The traffic on Montclair, between the prairie distributing centres are to be revised to secure the advantage of short line mileage.

The case took over a year in its hearing and the record comprised 19,500 sheets of paper of evidence, apart from extensive exhibits. The reduced rates called for will be effective on September 12.

PROGRESS IN AVIATION

It was interesting to scan Tuesday's papers and note the progress being made in the matter of aviation. Here are four front page items from the Calgary Daily Herald:

"Old Glory" the American monoplane left New York on August 30 on a non-stop flight to Rome.

"Pride of Detroit" piloted by W.S. Broch left Canada on a round-the-world flight. Arrived in Croydon, Eng., rested a few hours, and left for Munich, Germany. Next stopping place was Constantinople. They were cordially received at all points.

Charles A. Levine, who flew to Germany with C. Chamberlain, amazed aviators in France and Britain when he flew over from Paris to Croydon. He displayed a cool, daring that surprised British officials. It was his first experience as a pilot.

Taber taxpayers voted on Monday and gave an exclusive ten year light and power franchise for the town, the vote being 47 for and 1 against. The company is making good progress with its lines southward and when Lethbridge city falls within the entire south country will receive attention from the Calgary Power.

Official figures indicate that \$80,000,000 of life insurance is in force in the United States and over \$5,000,000,000 in Canada. This represents three things, a vast increase in national wealth; second, the diffusion of that wealth; and, third, a growing sense of foresight.

NOTICE OF SALE

Domestic Animals Act (Municipalities)

Notice is hereby given under Section 18 of The Domestic Animals Act (Municipalities) that the following described animal was impounded in a pound kept by N. H. Sygne, located on the Sec. 31-17-21, W. 1, on the 3rd day of August, 1927, and that the said animal was sold on the 7th day of August, 1927.

Bay Gelding, branded on right thigh, sold to B. R. Lommatzsch, of Vulcan.

Sorrel Mare and Colt, branded on left thigh, sold to B. R. Lommatzsch, of Vulcan.

Black Gelding, branded on left shoulder and S 4 on right thigh, sold to B. R. Lommatzsch, of Vulcan.

Bay Saddle Pony, branded on left thigh, sold to B. R. Lommatzsch, of Vulcan.

Bay Mare, branded on left thigh, sold to A. S. Babner, of Milo.

Brown Mare, branded on right thigh, sold to A. S. Babner, of Milo.

And that the said animals may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due the municipality and the purchasers of said animal.

For information apply to the undersigned.

J. K. McLEAN,
Secretary-Treasurer of Municipal District of Marquis, No. 157,
Vulcan, Alberta.

CANADA IS PROGRESSING

Canada is prosperous. There are few countries in the world more prosperous. Sometimes we think of our tremendous opportunities and our vast resources as we should be, but perhaps the following comparative table of trade statistics will show that we have little to complain of, and much to be proud of:

	1913	1926
Canada	1,000,000,000	2,000,000,000
United States	1,000,000,000	2,000,000,000
Great Britain	1,000,000,000	2,000,000,000
France	1,000,000,000	2,000,000,000
Germany	1,000,000,000	2,000,000,000
Japan	1,000,000,000	2,000,000,000
Italy	1,000,000,000	2,000,000,000
Spain	1,000,000,000	2,000,000,000
Portugal	1,000,000,000	2,000,000,000
Belgium	1,000,000,000	2,000,000,000
Netherlands	1,000,000,000	2,000,000,000
Sweden	1,000,000,000	2,000,000,000
Denmark	1,000,000,000	2,000,000,000
Switzerland	1,000,000,000	2,000,000,000
Austria	1,000,000,000	2,000,000,000
Hungary	1,000,000,000	2,000,000,000
Czechoslovakia	1,000,000,000	2,000,000,000
Poland	1,000,000,000	2,000,000,000

ITEMS OF INTEREST

One thing Americans have in common is a desire to acquire culture in six easy lessons.

Pullman porters have organized to abolish tips and to demand a "living wage."

It is estimated that Col. Lindbergh's new book "We" will net him a return of over a million dollars.

J. H. Ashdown Company has purchased the hardware part of Revillon Bros. business at Edmonton.

Those German philosophers were nearly right. War won't make a people tough, but grubbing to pay for it will.

According to a recent survey, Elvira Sam says, 50 per cent. of the farm women run their own cars, and the other half drive from the back seat.

In the medical examination of the Vermilion public schools, which was completed shortly before the holidays only 17 received a clear bill of health.

If weather conditions are favorable for the next ten days, the west will produce a 400,000,000 bushel crop in the opinion of the Dominion Minister of Agriculture.

The local customs officer looked suspiciously at the bottle. "It's only 'sniffant', stammered the returning traveller. "Oh, is it?" snorted Griesbach, and drank a mouthful. It was—Blairmore Enterprise.

Ramon Novarra, whose greatest film success was "Ben Hur," has, since the making of the movie spectacle, felt the urge of religion so strong that he will don the habiliments of a monk and retire from the screen for life in a monastery, it is reported.

J. J. Newton, of Calgary, appeared before P. G. Thomas, police magistrate, on Monday, charged with failing to keep to the right of the road. The accused pleaded guilty and was fined \$5.00 and costs or thirty days. Fine and costs were paid.

The first shipment of antelope from Canada to the United States will be made at an early date, Charles Blazer rancher at Lake Newell, announced recently. He has contracted to deliver 22 head of antelope to a Texas banker.

Married in High River, on Friday, August 19th, at the Baptist parsonage Miss Ida J. Pederson of Brant, to Jakob K. Hansen, also of Brant. The Rev. R. E. Williams officiated. Mr. and Mrs. Hansen will reside in the Brant district.

Canada's net debt decreased by \$2,498,429 during the first four months of the fiscal year. It now stands at \$2,295,335,940. During the corresponding period of last fiscal year there was a decrease of \$42,251,805. Both revenues and expenditures show increases.

Evidence of prosperity are to be seen in many towns in Southern Alberta. Drive about the streets of this town and note the number of new buildings, residential and commercial that are being constructed, all of which is evidence of sound development. The same applies to Blackie, Okotoks, Nanton, Vulcan and other towns hereabouts.

Bishop Fred Hahn, who has been conducting evangelistic services in a tent on the local camp grounds for the past three weeks, appeared before P. G. Thomas, police magistrate, on a charge that he did on the 24th day of August, perform a marriage ceremony without holding a certificate from the provincial registrar. He pleaded guilty to the charge and was fined \$25 and costs. A. W. Holton prosecuted. —The High River Times.

Reports that the Prince of Wales intends to attend the Dempsey-Tunney fight are officially declared to be without foundation. The prince, it is intimated, will sail from Quebec on September 7, according to schedule and has no intention of visiting the United States during his present trip. The sugar beet are making the best showing since the new factory was built. They are filling in-between the rows, and, with two months of growth yet to make, heavy tonnages are promised.

The E.P. Ranch has been more popular as a recreation ground on all days this year than ever. The great majority of visitors are very appreciative and are courteous and thoughtful about the live stock and buildings. Some few, however, are taking it for granted that the place is a sort of public park and are presuming on the privileges extended them. This has become so troublesome that His Royal Highness has definitely instructed the manager, Prof. W. L. Carlyle that the dwelling house is his private residence and as such is not open to the general public. He expressed himself as greatly pleased with the number of visitors that came to see his ranch and live stock and is glad to extend them this privilege at all times. Many parties coming with their children leave the youngsters to roam about at will leaving worm gates and doors to buildings open and are a great annoyance and a danger to some of the valuable animals. It is to be hoped the public in visiting the ranch will observe due care and consideration for property and live stock as there is a danger the place will be closed to the public.

ITEMS OF INTEREST

It is said that the crops of Ontario and Nova Scotia have been hit by scab.

Spillers Overseas Limited, Calgary flour mills, are now operating with a capacity of 2,000 barrels a day.

The resignation of Lord Cecil from the Baldwin government owing to disagreement has not disturbed Premier Baldwin's equanimity.

Mr. Catalini of Bellevue, has purchased the Corona hotel at Medicine Hat. The purchase price was around \$35,000.

The city of Lethbridge had the Prince of Wales and Prince George as their guests for about half an hour on Thursday last.

With two cases of infantile paralysis isolated in the hospital, Rossland city council declared a ban on an x-ray erases of children under 16.

The Department of Lands and Forests of this Province have planted 1,600,000 trees this year—a record figure and nearly double that of last year. Next summer it is proposed to plant 3,000,000 trees.

Significance is attached to a big political dinner being given next month in Montreal at which Hon. R. B. Bennett will be the honor guest. It is considered as a boost for his candidature for the Conservative leadership.

Fifty thousand dollars was spent by New York on its Lindbergh welcome. Particulars of the expenditures being asked for, New Yorkers were informed that \$12,324 was spent on tickets, invitations, etc., and \$4,820 on the menu cards for the official dinner.

Flying Officer A. L. Morfee with L. A. C. Lortie as passenger, left the local Air Station on Monday morning, August 29 and proceeded by air to Melfort Saskatchewan where they arrived during the afternoon of the same date. This aircraft will operate from this temporary base on photographic operations for the topographical survey department of Canada.

Comes from Clarence Chamberlain, trans-Atlantic flier, a story that Charles A. Levine, who accompanied him to Germany, was more worried about a roll of bills on their trip than about himself. He forgot to leave the money behind for his payroll. "When he thought of it," Chamberlain relates, "he shouted in consternation, declaring that he certainly hated to go down into Davy Jones' locker with all that money on him."

Herman Trelle, world's champion wheat and oat grower, is paving the way for a new triumph that will likely cause a stir in the grain growing belts of Canada and the United States. This is a new variety of wheat which can be sown later and ripens 18 days earlier than present varieties, and which is expected to cause a revolution in wheat growing in Western Canada. When members of Dr. King's party visited Mr. Trelle's farm at Wembley during their recent tour of the north country, they found that successful experiments are being conducted with this mystery wheat. It has been supplied from the Dominion experimental farm at Ottawa and gives indications of creating a sensation in Western Canada. The samples were examined by members of the party and all were obviously impressed with the results of the initial test. This year Mr. Trelle is enlarging his holdings and has 480 acres as compared with 160 acres last year. He plans on continuing his experimental work on a large scale, according to members of the party.

BLACKIE NEWS

The death took place at her home in California, Ont., on July 19th last of Mrs. D. C. Lindsay at the age of 52 years, after a brief illness. The deceased was a sister of Misses J. D. and J. O. Turner of Blackie and Mrs. H. M. Brocklebank of High River. Upon receiving word of her illness, Mr. and Mrs. Brocklebank left for the East and were present before her death. The funeral took place on July 21. Mr. and Mrs. Brocklebank are expected home this week.

Messrs. Yeoman and Dancy are to be complimented on their enterprise in planting trees along the frontage of their farms. Over 460 trees were planted last April and with few exceptions all the trees grew. Caragana seeds were also planted and these are growing nicely. In a few years they will have a fine windbreak which will enhance the value of their property. A splendid crop of wheat that looks good for 45 bushels to the acre is ripening rapidly. Here's hoping that all crops are safely garnered.

Mr. Robert Fringer has been a busy man for the past ten days grading the road west of Gladys in the Sheep Creek Municipality, which has been practically impassable during the past few years. Bob has done an excellent job and the residents of Gladys district fully appreciate having an outlet to the Macleod trail as this is their main road. All those who have occasion to travel over this road are offering their congratulations to Councilor Andrews in securing Mr. Fringer to perform this very necessary work.

BERRYWATER NEWS

On August the 4th, the Berrywater U.F.W.A. ladies were entertained by the ladies of the Eastway W.I., at the home of Mrs. F. Lent's. Owing to the holiday season several of our members were unable to attend. Those present report a very pleasant afternoon, and a splendid programme provided by the Eastway ladies, also an interesting address by Mrs. Alcock of Champion.

The Berrywater U.F.W.A. met at the home of Mrs. W. Campbell on August the 17th, Mrs. N. S. Campbell presiding. After the minutes were read and disposed of, several items of business were discussed, the ladies all agreeing to donate our usual sum of ten dollars to the Marquis School Fair. Mrs. Sinclair read a very interesting paper on "The Training of Children on Laws of Sex." Mrs. W. Campbell demonstrated on several different kinds of embroidery stitches. At the close of the meeting the hostess served a very dainty and appetizing lunch. Our next meeting will be held on August the 24th at Mrs. W. Speers.

A liberator is one who suppresses those who formerly suppressed his crowd.
